

GOAT Textiles

Ethically Produced Cotton Textiles

About Us

GOAT Textiles was established to provide businesses with an end-to-end solution for conceptualising and manufacturing high quality textile products. With a developed network of overseas suppliers and a UK based management team boasting over 20 years' industry experience, we work with brands of all sizes to bring to life their creations, just as they were imagined. From developing the initial designs and producing samples, to full production and arranging packaging and delivery, we are with you every step of the way to ensure a seamless and hassle-free journey.

Who we work with

We work with small, medium and large fashion and home textile designers requiring development and production of high quality garments and fabric materials. Thanks to our extensive network of producers we can fulfill very high volume orders.

What We Do

Clothing

Home Textiles

Accessories

Towels

GOAT TEXTILES HAS THREE DIVISIONS

1

DESIGN & DEVELOPMENT DEPARTMENT

We have our very own in house Design & Development Department that will work collaboratively to manufacture samples to your satisfaction. We do this by having clear technical packs and guidelines.

2

SOURCING & MANUFACTURING DEPARTMENT

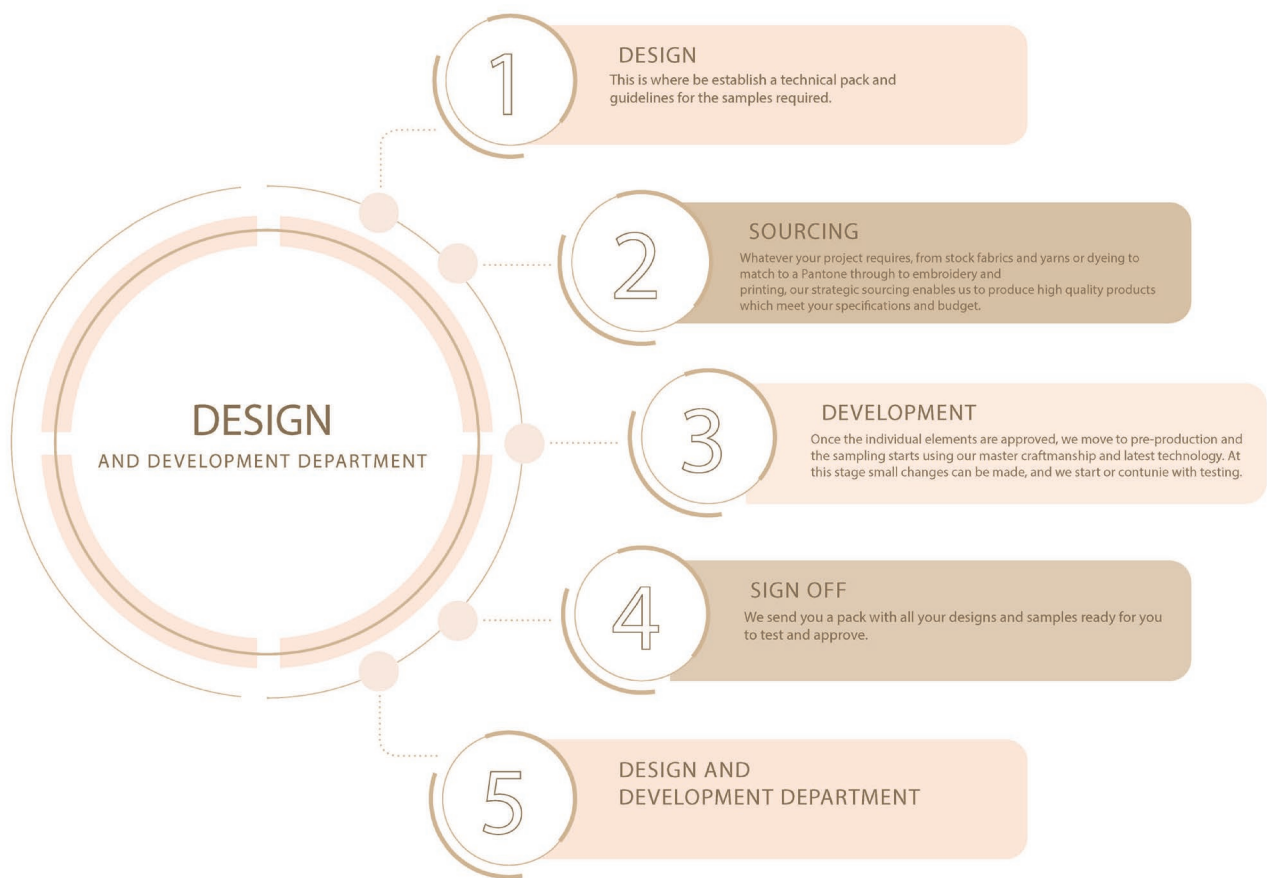

With our years of experience and strong relationships we source your requirements at the most cost-effective prices. We will then take care of the whole production execution from procurement & production to washing & shipment.

3

THIRD PARTY INSPECTIONS

We also offer a high end Third Party Inspections services. A team of expert professionals that will carry out third party inspections using advanced techniques. Our range of service includes factory audit, Garment 100% audit services, initial production inline production check, final random inspection offered at most competitive prices.

We have developed strong relationships with fantastic mills, factories, fabric and trim suppliers and we value these partnerships highly. Along with our quality control and sourcing team, we visit factories annually to stay in touch with the people, new technologies and importantly to ensure ethical, social and environmental compliance is in place. We pride ourselves on a responsible approach towards manufacturing.

Design & Development

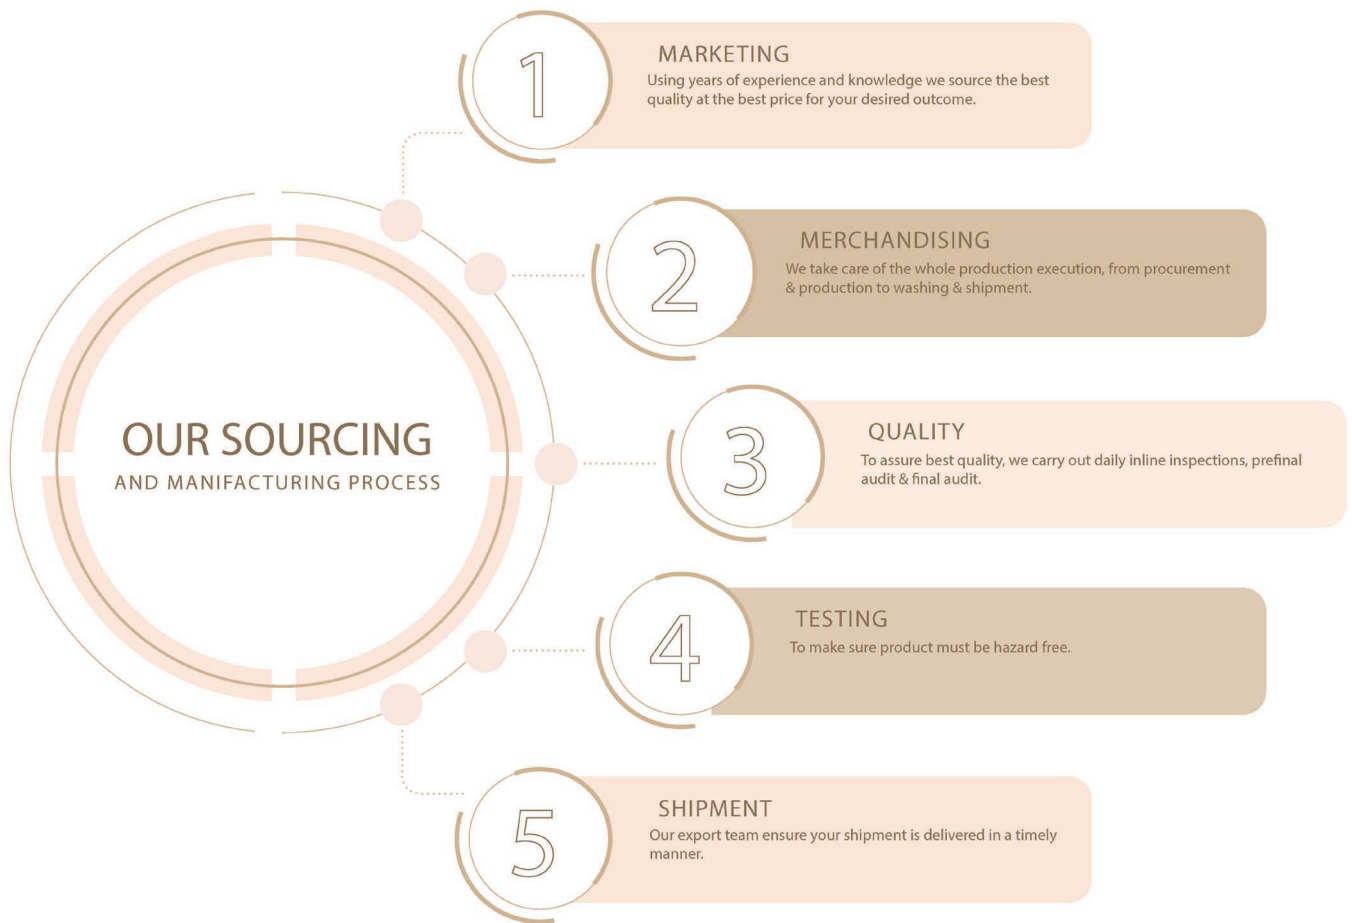

Our inhouse design and development team use the latest tools and CAD software to take your concept and create detailed blueprints & tech packs. With a UK based development team you can be sure nothing is lost in translation.

Sourcing

Over the years, we have developed strong relationships with trusted mills, factories, fabric and trim suppliers. We are constantly increasing our supplier base to ensure we can cater for all material requirements, no matter how large the scale.

Sampling

Bringing a new product to market involves rigorous testing for factors such as colour fastness, durability and fitting. Our team will work closely with you to provide pre-production samples and guide you through legal and safety requirements necessary before production can begin.

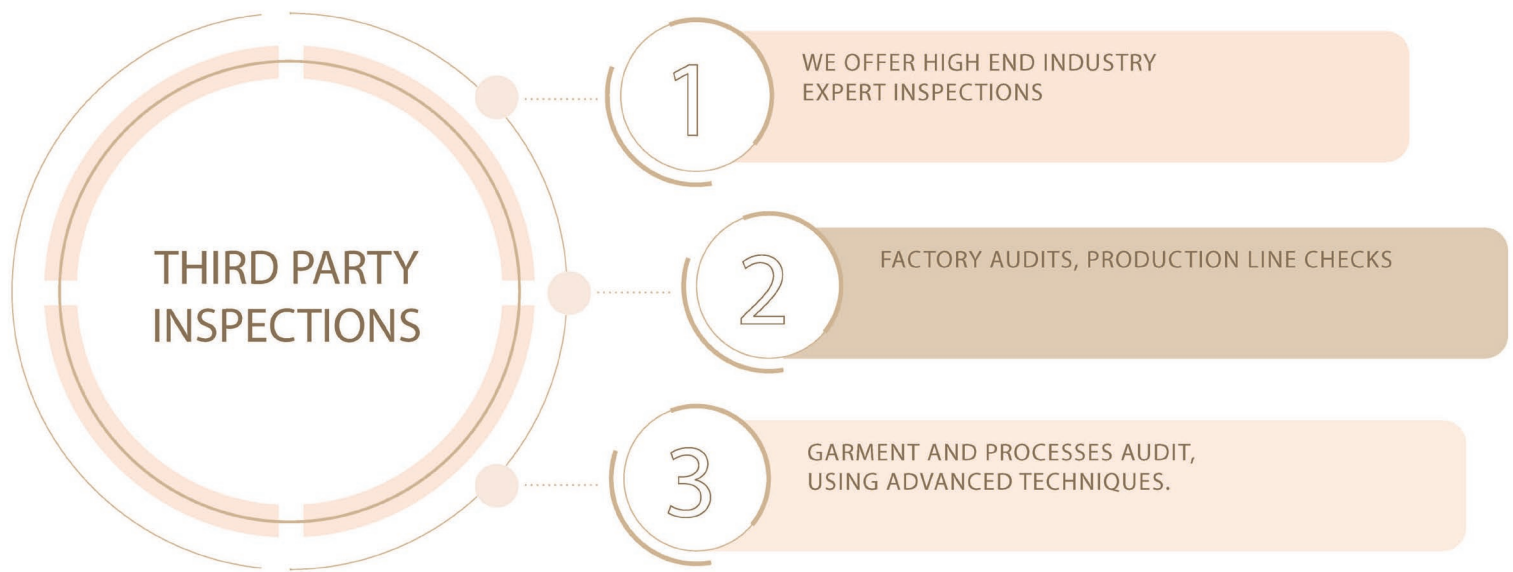

Production

Based in Karachi, Pakistan, our family run factory and fulfillment team use the latest in production technology to produce the highest quality products to the most exacting specifications. As a family business, it's personal. This means we regularly inspect premises to ensure the best working conditions are maintained for employees in line with our commitment to ethical practices.

Quality Control, Packaging and Delivery

Following production we use independent quality controllers to ensure every garment meets your specifications based on the 2.5 AQL process. In line with our mission towards more environmentally friendly production practices, we minimise plastic use by packing garments in compostable bags and using stitches to attach header cards onto clothing.

Once the order is complete, we can take care of shipping via our freight forwarding partner or provide you with an alternative solution based on your budget.

Third Party Quality Control

To ensure every garment is produced to the highest standards we utilise a team of quality control professionals who carry out third party inspections using the latest techniques. Our range of QC services includes in-factory audits, garment 100% audit services, initial inline productions checks and final random product inspections. The following defects are detected during this process:

Loose or hanging threads
Colour defects and stains
Fabric defects
Exposed Notches
Pulled or loose yarn
Holes
Defected Stitches

"Supporting leading fashion brands with exclusive quality textiles and providing emerging businesses access to sustainable and environmentally friendly overseas production expertise"
