

ARROW TEX

FABRIC FACTORY

Manufacturers & Exporters of Knit Garments and Cloths

In 2004 Arrow Tex was founded in the industrial city of Tirupur in the south Indian state of Tamil Nadu. From the outset the goal has been to establish a modern and technologically dynamic apparel manufacturing factory that can accommodate ever changing fashion industry needs. From its humble beginning in 2007 with less than 25 power operated sewing machines, Arrow Tex had grown into a major manufacturing facility in less than a decade. Today's Arrow Tex is equipped with 150 power operated Japanese sewing machines that are most modern and the finest in the industry. Lean management principles are followed throughout the organization to achieve maximum efficiency.

Advanced machinery operated by highly qualified personnel in the industry makes Arrow Tex among the best in the apparel manufacturing craft.

QUALITY CONTROL SYSTEMS(QA):

Every stage in the manufacturing process is monitored carefully to insure quality. Dedicated team of inspectors are strategically placed starting from the raw materials sourcing through the Arrow Tex packing and shipping.

- * Best quality yarn is procured from the best sources around the world
- * Fabric knitting/weaving is continuously monitored to maintain consistency
- * Fabric processing is done in eco-friendly plants with the least impact on the environment
- * Every roll of the finished fabric is thoroughly checked before it is moved to the manufacturing floor
- * During production (DUPRO), End Line Inspection(ELI) and Pre-finishing Random Inspection(PRI) are well integrated to ensure each garment passes through several points of inspection before reaching the finishing section
- * Pre-packing inspection is carried out at the final check point before the garments are packed in cartons
- * Pre-Final Random Inspection: Factory's in-house inspection team is well trained and authorized to contact a rigorous inspection before the official inspection from customer's nominated inspection agency.

MANAGEMENT TEAM:

Best business practices are followed throughout the organization.

Dedicated personnel

- * WOMEN
- * MEN

COMMUNITY AND INDUSTRY DEVELOPMENT INITIATIVES:

1. Women empowerment and rural area development: We are committed to creating job opportunities for women in underdeveloped rural areas. Arrow Tex Manufacturing unit #2 in the sub-urban area Tamil Nadu was formed in 2016 towards this initiative. In less than 3 years, we have successfully recruited, trained and currently employing well over 100 women in the local area.
2. Water harvesting/conservation: Arrow Tex's newly built head office is a model factory for water harvesting & conservation. Entire facility has been carefully engineered to channel the water during the rain to underground storage tank and improve the ground water level in the area.
3. Lean Management System:
Arrow Tex has invested with a highly qualified management professionals to develop systems to improve efficiency and minimize wastage. Well designed management packages are made available to factories in the industry at a nominal cost and along with continuous training. Our primary purpose in this initiative is to educate & train about efficiency and cost saving methods among our contemporaries in the Industry
4. Power conservation: Arrow Tex draws power from solar power panels to meet 60% of the total needs. We continue to invest more in solar pannel and also in windmills to reduce our dependency on trad it lol Power grids even Lower
