

PINK  
CROWN  
International Co., Ltd.

*The Highest Standard in the Industry*

# About Us

*We are a textile and garment converter utilizing cutting-edge own research and development and the latest production facilities as well as subcontracted mills*

Subcontracted  
Yarn Supplier

Joint Venture  
Dyeing Factory

Garment Factory

# Our Product

## Fabric Specialty

➤ Thermal Collection:

- *When temperature drops and things get cold, the fabrics in our thermal insulation collection will keep you going in the grueling cold temperature so you can still enjoy the sports you love*

➤ Stretch Collection:

- *During exercise, the stretch ability is to help you applying pressure to the skin surface. Thus increase the body's awareness for improved posture and stability.*

➤ Vent. Collection:

- *Mesh ventilation panels allow hot air to escape and cool air to enter, reducing heat fatigue and improving circulation*

# Thermal Collection

## Fabric Specialty

### *Air Fleece*

- *Knitted using special hollow fibers to create super lofty fleece that traps more hot air than traditional fleece to form an insulation layer that keep you warm and minimize weight so you can always stay focus on your sport.*

### *Jacq. Fleece*

- *Using special knitting technique to create geometric shape “air pocket” that traps hot air to form an insulation layer that keep you warm and minimize weight. The specially engineered air channels promote air circulation so you will feel always feel dry and comfortable.*

### *Soft-Shield*

- *Serious athletes will not let any obstacles get in their way, not even the weather. Our Soft-shield Fleece is equipped with high-tech DWR protection so our athletes will stay warm and dry no matter what the weather is like.*

### *Bonded Shell*

- *Durable and ultra light weight fabric provides superior comfort and coverage while WR finish keeps the rain away and gives you the total protection you deserve so you can focus solely on your workout.*

# Stretch Collection

## Fabric Specialty

### *Tricot fabric*

- *Tricot fabric compression has been engineered to provide the correct level of surface pressure to specific parts of the body.*

### *Interlock*

- *With high percentage of Spandex, Interlock stretch fabric offers the best stretch ability and coverage for athlete.*

### *Textured Jacq.*

- *Structural stretch is to engineer to provide the correct level of surface pressure to specific parts of the body. This enhances circulation and gets more vital oxygen to your active muscles –boosting your power, speed and stamina.*

### *Nylon*

- *Nylon is very much suitable for the knitted fabrics because of its smoothness, light weight and high strength. Also, Nylon has good elasticity which makes it much suitable for the apparel purposes. The excellent elasticity would mean that the nylon materials return to their original length and sheds the wrinkles or creases. The high elongation and excellent elastic recovery of nylon contributes to the outstanding performance in knitted fabrics.*

## Vent. Collection

### Fabric Specialty

#### *Jacq. Mesh*

- *The jacquard mesh provide maximum breathability with novelty pattern*

#### *Body Mapping*

- *It provides maximum breathability and enhance cooling effect. Thus, heat and moisture will move away from the specific area and attain stink-proof*
