CLOTHING
MANUFACTURING
IS A PAIN,

WE
MAKE IT EASY.

1/ WHO WE ARE

We are more than just a clothing manufacturer and *you* are more than just a client. We work together as a family, with a shared goal for the success of your brand.

With 14 years of experience and offices in the UK, China, and Spain, we focus on manufacturing high-quality clothing for brands worldwide. Our mission is to make a positive impact through ethical and sustainable practices.

2 / MEET THE FOUNDERS

HOW DID APPAREL LABS BEGIN?

Seeing how many companies struggled with issues like scams, bad communication, and long waits.. that ended in disappointment. We knew we could offer a better service. Plus, with us both speaking Spanish, English, and Chinese - gave us a great advantage!

7 / WHAT OUR CLIENTS THINK

Miguel Facussé

Apparel Labs has been with us from the start, developing a new pair of pants that drove crazy scale and the appropriate replenishment speeds required to meet demand

Garret Devore

Apparel Labs help us develop a new underwear line from scratch. They were key in helping us streamline the crowdfunding process and were very accommodating with deposits and timelines

8 / FREQUENTLY ASKED QUESTIONS

HOW DO I GET STARTED?

It's super easy to get started! Just send us an email with what it is you're looking to manufacture or message us via Whatsapp (whichever you prefer). We can take it from there!

WHAT IF I DON'T HAVE A TECH PACK?

That's ok! We can work with you to develop a tech pack. This is included as part of our development package.

WHAT COUNTRIES CAN I SOURCE FROM?

You can source from China, Vietnam, Peru, Turkey and Portugal. Fabrics can be sourced from additional locations as needed.

CAN I PRODUCE AN EXISTING COLLECTION WITH YOU?

Absolutely. There's a high chance you'll get better pricing and higher production quality when you make the switch to us!

WHAT IF A PRODUCTION RUN IS DEFECTIVE?

It rarely happens but if a production runs come out defective, we request that the factory re-do the defective batch **at their expense**. That's why we don't pay factories until production is up to par. That's also why having boots on the ground is so important!

READY TO GET STARTED?
